Connecting to Student H: & W: Drives for Mac Users

Access to Your H: & W: Drives On-Camus

The new server environment provides users with an automatically backed-up home (or H:) drive and web space (also known as the W: drive).

- To map the shares on campus select the “Go” menu.
- Then select “Connect to Server.”
- In the “Server Address” box, type smb://win-fs2.wilkesu.wilkes.edu/home/username to map your home share, and smb://web2.wilkesu.wilkes.edu/web/username to map your web share.

The H: drive is your secure personal server space, where you may locate documents you want to be accessible from other network locations or remotely.

Your new W: drive is web space that serves your web pages to the general public.

The naming scheme for your web space is: http://web2.wilkes.edu/UserID. For example: http://web2.wilkes.edu/jane.smith

To create your personal website, an index.htm page and basic knowledge of website architecture and design is required. If you need assistance, contact the Help Desk.
