THE SCHOOL OF PHARMACY

The School of Pharmacy

DEAN: Dr. Scott Stolte
Assistant/Associate Deans: Dr. Jonathan Ference, Dr. Jennifer Malinowski, Dr. Julie Olenak
Chairperson, Department of Pharmaceutical Sciences: Dr. Zbigniew Witczak
Chairperson, Department of Pharmacy Practice: Dr. Edward Foote

Faculty

Professors: Foote, Kristellar, Witczak
Associate Professors: Bolesta, Bommareddy, J. Ference, K. Ference, Jacobs, Longyhore, Malinowski, Manning, McManus, Olenak, Roke-Thomas, Trombetta, VanWert
Assistant Professors: Franko, Hong, Kheloussi, McCutcheon, Miller, Pezzino, Shah
Instructors: Conlogue, Holt-Macey, Koos, Powers
Professor Emeriti: Kibbe

The School of Pharmacy offers a program of professional study leading to the Doctor of Pharmacy (Pharm.D.) degree. The purpose of the program is to prepare graduates for successful pharmacy practice in the health care environment of the twenty-first century.

The U.S. health care system has been undergoing rapid, even dramatic, change. This transformation is expected by most observers to continue for some time. Those individuals and organizations responsible for the delivery of pharmaceutical care have not been and will not be sheltered from the forces of change. It becomes necessary, therefore, to provide new practitioners with the necessary knowledge base and skills required in a transformed health care system.

With the rapid transformation of health care delivery, a strong foundation in the basic sciences (e.g., pharmaceutics, pharmacology, medicinal chemistry, anatomy and physiology) remains essential, while clinical knowledge (e.g., therapeutics, pharmacokinetics, pathophysiology) and skills (e.g., physical assessment, patient counseling, clinical decision-making) become even more important. Successful practice will demand an improved understanding of the social sciences (e.g., psychology, sociology, economics, health, policy, management). Most importantly, the future pharmacy practitioner must have outstanding interpersonal skills. Among these are the abilities to communicate effectively and to function in a team environment.
Our Mission
Our mission is to develop pharmacists who will provide high quality health care and to make meaningful contributions to the science and practice of pharmacy.

Our Vision
We will be recognized as an exceptional pharmacy program through innovative education, contemporary practice, and valuable scientific contributions.

Our Values

Accreditation
Wilkes University's Doctor of Pharmacy program is accredited by the Accreditation Council for Pharmacy Education, 135 South LaSalle Street, Suite 4100, Chicago, IL 60503, (312) 664-3575, FAX (312) 664-4652, web site: www.acpe-accredit.org.

The Doctor of Pharmacy Program
The six-year Pharmacy Program at Wilkes University consists of two components. The first is the two-year Pre-Pharmacy Program, and the second is the Professional Program.

Pre-Pharmacy Guaranteed Seat Program
Admission to the Pre-pharmacy Guaranteed Seat Program (Enrollment Limit: up to 90)

Students may only enter the Pre-Pharmacy Guaranteed Seat Program as freshmen from high school. Minimum criteria for consideration for admission are listed below.

Applicants for the Pre-Pharmacy Guaranteed Seat Program must first complete a Wilkes University Application, which may be obtained from the Office of Admissions. Applicants who meet the SAT and class rank criteria will be forwarded an application for the School of Pharmacy. The School of Pharmacy will review these applications, and top applicants will be invited for a personal interview. Final admission into the program will be based on a thorough evaluation of students based on high school rank (or GPA if school does not rank), SAT/ACT scores, the Letter of Intent essay, and the results of the personal interview. Interviewed applicants not selected for immediate admission will be placed on a wait list. Wait-listed students will be offered seats in the Pre-Pharmacy Guaranteed Seat Program as seats become available. In some instances, students may not be notified of an available seat in the Pre-Pharmacy Guaranteed Seat Program until the summer. School of Pharmacy applications for the Pre-Pharmacy Guaranteed Seat Program must be completed by February 1. There are typically many more applicants than seats in the entering Pre-Pharmacy Guaranteed Seat Program. As applicants are admitted on a rolling basis, all seats may be awarded before the February 1 deadline. Applicants are encouraged to complete the application process as early as possible.

Applicants should review the Technical Standards set forth by the School of Pharmacy that are available at:

http://www.wilkes.edu/academics/colleges/nesbitt-college-of-pharmacy/program-information/pre-pharmacy-guaranteed-seat-program/technical-standards.aspx

These Technical Standards describe non-academic abilities that are required for admission to, continuation in, and graduation from the School of Pharmacy to obtain a Pharm.D. degree.

Minimally, each applicant to the Pre-Pharmacy Guaranteed Seat program must:

• be a graduate of, or near graduation from, an accredited high school or academy;
• rank in the upper half of his or her class;
• attain a combined SAT score of 1080 or ACT 22 or greater;
• complete the School of Pharmacy Pre-Pharmacy Application (This application is in addition to the Wilkes University Admissions Application.), including the Letter of Intent;
• submit three recommendation letters from teachers, employers, pharmacists, or other individuals who can provide an objective appraisal of the student's ability;
• be prepared to discuss their knowledge of the pharmacy profession through individual research, optional shadowing experiences, or discussions with pharmacists; and
• successfully complete an interview with the School of Pharmacy.

PLEASE NOTE: Attaining minimum academic requirements does not infer or promise either an interview or admission into the Pre-Pharmacy Guaranteed Seat Program!

To be admitted into the Professional Program of the School of Pharmacy, a student must have either enrolled in and successfully completed the Pre-Pharmacy Guaranteed Seat Program at Wilkes University as outlined above or have submitted a successful application to the School of Pharmacy.

Pharmacy Professional Program

The Professional Program is four years and leads to the Doctor of Pharmacy (Pharm.D.) degree. Graduates of the program are eligible for state examination to become licensed pharmacists after completing appropriate internship hours. The four years of education consist of three years of in-class (i.e., lecture, laboratory, discussion group) and one year of advanced experiential education.

Admission to the Professional Program
(Enrollment limit: 72)

To be admitted into the Professional Program of the School of Pharmacy, a student must meet ALL of the following conditions are automatically admitted to the Professional Program:

• You must complete four semesters as a full-time Pre-Pharmacy student and successfully complete, with a 2.0 or higher, ALL prerequisite courses at Wilkes University, specifically by the end of the spring semester prior to admission. PREREQUISITE COURSES are listed in the PRE-PHARMACY PROGRAM (previous page) marked with a (*);

• You must maintain a PREREQUISITE COURSE cumulative GPA of 3.0 or better for the PREREQUISITE COURSES through the spring of the fourth semester (sophomore year). Failure to maintain a prerequisite cumulative GPA of 3.0 or better in the PREREQUISITE COURSES through the spring of the fourth semester (sophomore year) will result in forfeiture of the guaranteed seat;

• You must maintain a cumulative GPA of 3.0 or better for all courses taken through the spring of the fourth semester (sophomore year). Advanced placement courses may be accepted in fulfillment of some of these requirements. However, grades for AP-accredited courses will not be factored into the prerequisite or overall GPAs. Although non-prerequisite course credit hours may be transferred to Wilkes from other colleges, you should be aware that grades do not transfer. In other words, if you take courses somewhere else, the credit hours may be transferred, but your Wilkes GPA will not be affected. Failure to maintain a cumulative GPA of 3.0 or better in all courses taken through the spring of the fourth semester (sophomore year) will result in forfeiture of the guaranteed seat;

• You must earn grades of 2.0 or greater in all PREREQUISITE COURSES through the spring of the fourth semester (sophomore year). One PREREQUISITE COURSE grade of less than 2.0 may be repeated at Wilkes University with the higher grade replacing the lower grade on the official transcript. PREREQUISITE COURSES must be recorded with a grade of 2.0 or greater by the end of the spring semester prior to admission. Earning a grade of less than 2.0 in a PREREQUISITE COURSE that cannot be repeated by the end of the spring semester prior to admission will result in forfeiture of the guaranteed seat. Also, earning two or more PREREQUISITE COURSE grades of less than 2.0, even if one is successfully repeated, will result in forfeiture of the guaranteed seat and dismissal from the program. (Please see below, Admission through the Application Process.)

• If you feel you can complete ALL prerequisite courses and all except two General Education courses by the end of your spring freshman semester, or you have extenuating, non-academic circumstances that will prevent you from completing the program within two years, you should contact your advisor and the Assistant Dean of Student Affairs to discuss the appeal process and possibly obtain a modified Pre-Pharmacy Guaranteed Seat contract detailing the conditions for admission.

• You must score at least in the 25th percentile on the composite Pharmacy College Admission Test (PCAT). The School will only accept PCAT scores from the July, September, and October/November dates; we will not accept scores from the January test for the upcoming year. The School of Pharmacy will accept the highest PCAT scores of multiple attempts. Failure to score at least in the 25th percentile in the PCAT after a single or multiple attempts will result in forfeiture of the guaranteed seat;

• You must maintain the highest levels of academic and personal honesty and be free from criminal/drug-related offenses throughout the pre-pharmacy and pharmacy program. Pharmacy students must complete annual criminal background checks as a requirement for progression and retention within the School of Pharmacy;

• Students caught in the act of cheating, collusion, plagiarism, or other and all acts in violation of the Wilkes University policy on Intellectual Responsibility and Plagiarism or the Student Code of Conduct may be subject to dismissal from the Pre-pharmacy Guaranteed Seat Program;

• You must receive a favorable recommendation from your Pre-Pharmacy advisor at the end of your spring semester prior to admission. Failure to receive a favorable recommendation from your Pre-Pharmacy advisor at the end of your spring semester prior to admission will result in forfeiture of the guaranteed seat; and

• You must meet all the criteria set forth in the Technical Standards Document. Failure to meet the criteria set forth in the

**Some requirements may be fulfilled via satisfactory achievement on advanced placement tests or Wilkes’ challenge examinations.
Pharmacy

Technical Standards Document may delay or prevent graduation from the Nesbitt School of Pharmacy.

A maximum of two uncompleted General Education Curriculum requirements will be considered for admission into the Professional Program in Pharmacy. Pre-Pharmacy Guaranteed Seat students with more than two uncompleted General Education courses may appeal to the Student Affairs Committee of the School of Pharmacy for consideration. There is no room in the Pharmacy Curriculum to complete General Education requirements. General Education Curriculum requirements may be completed at other accredited colleges or universities and transferred into Wilkes University with proper approval.

Students in the Wilkes University Pre-Pharmacy Guaranteed Seat Program who do not meet these conditions must compete for available seats in the Professional Program through the application process.

II. Admission through the Application Process

Faculty reserve the right to select from among the applicants who will have the best opportunity to complete the curriculum within four years and have productive professional lives. Admission is based upon the student’s academic ability as reflected in grades from Pre-Pharmacy courses, number of courses repeated, typical course loads, PCAT scores, total academic career, and references, as well as a successful interview. If applicable, the committee will also consider the most recent academic performance for those non-traditional students returning to college life after a hiatus. Each spring, a select group of applicants is invited for an interview, based upon a complete evaluation of all submitted application materials. Any missing documentation will compromise the application. We must receive your PCAT results prior to the January 15th deadline.

The number of seats in the professional program available through the application process is dependent on the number of Pre-Pharmacy Guaranteed Seat students able to claim a seat. A portion of remaining seats are available on an academically competitive basis to Wilkes Students with overall and prerequisite GPAs above a 3.0, and a portion of seats is available to transfer students with overall and prerequisite GPAs above a 3.0 on a competitive basis. To be classified as a Wilkes student, the student 1) must complete and be enrolled at Wilkes University for two full-time consecutive semesters before enrollment in the Professional Program AND 2) must complete 18 credits of prerequisite courses at Wilkes University by the end of the spring semester prior to enrollment in the Professional Program. Failure to meet both of these criteria will result in classification as a "transfer student."

Applicants should review the Technical Standards set forth by the School of Pharmacy, which are available at:

http://www.wilkes.edu/academics/colleges/nesbitt-college-of-pharmacy/program-information/pre-pharmacy-guaranteed-seat-program/technical-standards.aspx

These Technical Standards describe non-academic abilities that are required for admission to, continuation in, and graduation from the School of Pharmacy to obtain a Pharm.D. degree.

How to Apply

To obtain a School of Pharmacy application, call or write

School of Pharmacy
Wilkes University
Wilkes-Barre, PA 18766

(570) 408-4280
1-800-WILKESU, ext. 4280

OR

download an application from:

http://www.wilkes.edu/academics/colleges/nesbitt-college-of-pharmacy/program-information/pharmd-program/how-to-apply.aspx

PLEASE NOTE: The School of Pharmacy application is in addition to the Wilkes University application. All applicants must complete the School of Pharmacy application and return it before January 15th for the upcoming Fall semester.

Pharmacy Professional Program – Minimum Admission Requirements

To be considered for admission to the Professional Program of the School of Pharmacy, the applicant

• should complete the Wilkes University General Education course requirements or have completed a baccalaureate degree. A maximum of two deficient General Education courses will be considered for admission into the pharmacy program. Students with more than two deficient General Education courses may appeal to the Student Affairs Committee of the School of Pharmacy for consideration;

• must successfully (2.0 or higher) complete all Pharmacy Prerequisite Courses listed below by the end of the spring semester prior to admission;

• must obtain a minimum overall GPA of 2.50 and a minimum GPA of 2.50 in the Pharmacy Prerequisite Courses listed below (Wilkes student) by the end of the spring semester prior to admission. Preferential consideration will be given to Wilkes Students with GPAs of 3.0 or higher;

  • We will evaluate the grades of higher-level science courses to include in the GPA calculations.

• must obtain a minimum overall GPA of 2.50 and a minimum GPA of 2.50 in the Pharmacy Prerequisite Courses listed below (non-Wilkes, transfer student) by the end of the spring semester prior to admission;

  • preferential consideration will be given to non-Wilkes transfer students with GPAs of 3.0 or higher;

  • We will evaluate the grades of higher-level courses to include in the GPA calculations.

• must obtain a grade of C (2.0) or better in each of the Pharmacy Prerequisite Courses listed below by the end of the spring semester prior to admission. Prerequisite grades of less than 2.0 may be repeated with the higher grade factoring into the GPA.

• However, applications will be placed at a lower priority if grades less than 2.0 in prerequisite courses are remediated and recorded.

• Students repeating 4 or more prerequisite courses, even if all are successfully completed, will not be considered for admission.

• Repeating courses in which a grade above a 2.0 was earned will not factor into the GPA. However, exceptions to the above rules will be considered on an individual basis and only if students can provide written explanation of extenuating circumstances;

• must maintain the highest levels of academic and personal honesty and be free from criminal/drug-related offenses throughout the pharmacy program.

• Students caught in the act of cheating, collusion, plagiarism, or other and all acts in violation of the Wilkes University policy on Intellectual Responsibility and Plagiarism or the Student Code of Conduct may be subject to dismissal from the Pharmacy program;
• Students will be required to submit, and clear per site requirements, for various types of criminal background checks annually, and as specified by external practice sites. Violations may result in prevention or delays in graduation;
• must meet all the criteria set forth in the Technical Standards Document. Failure to meet the criteria set forth in the Technical Standards Document may delay or prevent graduation from the Nesbitt School of Pharmacy;
• must provide three completed recommendation forms;
• must successfully complete the interview process;
• must demonstrate acceptable written communication skills; and
• must submit scores on the Pharmacy College Admission Test (PCAT) by January 15th. The School will only accept PCAT scores from the July, September, and October/November dates; we will not accept scores from the January test since we will not receive the results prior to the January 15th application deadline.

NOTE: Admission into the Professional Program in Pharmacy is extremely competitive. Earning the minimum academic criteria necessary to submit an application does not in any way infer or promise an interview or admission into the program.

Pharmacy Professional Program – Prerequisite Courses

• Two semesters (8 credits) of General Chemistry with labs
• Two semesters (8 credits) of Organic Chemistry with labs
• Two semesters (8 credits) of General Biology with labs
• One semester (4 credits) of General Physics with lab
• One semester (4 credits) of Calculus
• One semester (3 credits) of Statistics
• One semester (3 credits) of Microeconomics
• One semester (3 credits) of Oral Communications

III. Pharmacy Organization

Professional Standards
Students enrolled in the program of the School of Pharmacy are expected to endorse professional standards by subscribing to the Oath of the Pharmacist. Students are also expected to abide by the American Pharmacists Association’s Code of Ethics of the Profession.

Technical Standards
Students applying to and enrolling in the School of Pharmacy are expected to read, acknowledge, and understand the Technical Standards. These Technical Standards describe non-academic abilities that are required for admission to, continuation in, and graduation from the School of Pharmacy to obtain a Pharm.D. degree.

A candidate must have abilities and skills in the following five areas: 1) observational skills; 2) communication skills; 3) motor skills; 4) intellectual, conceptual, integrative, and quantitative skills; and 5) behavioral and social skills. Detailed descriptions of the Technical Standards are provided in the School of Pharmacy Application or by contacting the School of Pharmacy Dean’s office.

Progression Requirements
All students in the Professional Program of the School of Pharmacy are required to meet minimum standards for progression. Academic progression requirements include a minimum semester and cumulative pharmacy GPA of 2.0. In addition, no student shall be allowed more than 8.0 credits of less than 2.0 grades in required professional courses both inside and outside of the school. Any course with a grade of 0.0 must be repeated. At the end of each semester the progress of each student in the Professional Program will be reviewed. Students failing to meet minimal academic standards at the end of any semester must petition the Student Review Subcommittee through the Assistant Dean of Student Affairs to progress further in the School. More inclusive policies, including, but not limited to, Technical Standards, acceptable classroom and experiential site behavior, alcohol and substance abuse, and other issues impacting the image of the professional program and the student, adopted within these guidelines are distributed annually to all students in the Nesbitt School of Pharmacy Student Handbook. Advanced Pharmacy Practice Experiences (APPE) progression is described in the APPE Course Manual.

Experiential Curriculum Component
Experiential learning is a critical component of the curriculum at Wilkes. Before being placed in an experiential setting, (and repeated at varying intervals), all students are required to:

• possess an active Pennsylvania Pharmacy Intern License (comply with ACT 31 relating to CHILD ABUSE RECOGNITION AND REPORTING);
• possess professional liability insurance;
• have documentation of immunizations;
• pass a physical examination;
• be certified in Basic Cardiac Life Support (healthcare provider), Basic First Aid, and complete OSHA training;
• have a criminal background check completed and clear per site requirements, by an approved provider when required; and
• complete and clear other site-specific requirements, such as FBI fingerprint check, PA child abuse background check, etc.

These criteria are fully described throughout the curriculum, including deadlines and ramifications of non-compliance.

The Introductory Pharmacy Practice Experience (IPPE)
The Introductory Pharmacy Practice Experience (IPPE) consists of a number of different experiences. During the summer following successful completion of the P-1 year, students will complete a 2-week (80-hour) Introductory Pharmacy Practice Experience (IPPE I). The second professional year, the P-2 year, includes 40 hours of IPPE II during the fall and/or spring semesters. In addition, students will complete a 2-week (80-hour) IPPE III during the summer following the P-2 year. In the third year of the Professional Program, the P-3 year, the curriculum includes a two-semester course in service learning (longitudinal care) and 20 hours of IPPE IV. IPPE V is a self-directed IPPE and consists of 20 hours of independent pharmacy-related, service-oriented learning earned during the P1 through P3 years. IPPE’s occur at practice sites and in the community in the Wilkes-Barre/Scranton area, not on campus.

The Advanced Pharmacy Practice Experience (APPE)
The fourth year of the Professional Program, the P-4 year, is devoted to Advanced Pharmacy Practice Experience (APPE). Each student will be assigned to one six-week rotation, plus six five-week rotations, some of which may be at some distance from Wilkes-Barre. To the extent possible, the School of Pharmacy will assist in locating safe, affordable housing for APPE’s. Since patient care is a continuous activity, some experiences may be conducted outside of regular school and business hours. Note also that the APPE start and end dates do not adhere to the regular University calendar.

NOTE: The student is responsible for paying all transportation and housing costs associated with all experiential components of the curriculum, except where noted.

Graduation, Degree, and Licensure Requirements
It is the student’s responsibility to comply with all graduation requirements, and it is expected that all students accepted into the Pharm.D. Program will meet regularly and frequently with their advisors to ensure timely progress toward their Doctor of Pharmacy degree. Graduation is dependent on successful completion of all required and elective course requirements in
Pharmacy

the School of Pharmacy (see Progression Requirements) AND completion of all General Education Requirements mandated by Wilkes University.

A student entering the Professional Program with a bachelor’s degree from a four-year accredited U.S. college or university is exempted from the University’s General Education Requirements, but is not exempted from the prerequisite entry requirements prescribed by the School of Pharmacy for entry into the Professional Program. Students applying with degrees or courses from foreign Colleges or Universities will be evaluated to ensure significant portions of the General Education Requirements are satisfied.

All non-degreed students entering the Professional Programs are encouraged to complete the General Education Requirements prior to beginning the Professional Curriculum. As mentioned, a student may be deficient in two General Education Requirements and be granted admission into the program. Students will receive consultation and documentation from their advisor that these courses must be completed prior to graduation. Students with more than two deficient General Education courses may appeal to the Student Affairs Committee of the School of Pharmacy for consideration. This requirement is in place since there is limited room within the professional curriculum, including summers, to complete the courses.

As a matter of record, non-degreed students who have successfully completed the second professional year (P-2) in the School of Pharmacy AND completed all General Education Requirements will be awarded a generic Bachelor of Science degree. The pass-through B.S. degree does not meet eligibility requirements for licensure as a pharmacist; it is only intended to acknowledge the academic achievement of students completing four years of university-level education.

Pharmacy licensure is governed by state law. All states require graduation from an accredited School or College of Pharmacy. Additional requirements for licensure should be requested from the state in which licensure is sought. It is the student’s responsibility to fulfill all requirements for the state in which they seek licensure. Students must contact that State Board of Pharmacy for all appropriate paperwork. For further information, please contact the Dean’s Office in the School of Pharmacy.

The School of Pharmacy reserves the right to revise the Pharmacy Curriculum at any time in order to prepare students for future practice roles, meet new accreditation requirements and to incorporate innovations in instruction.

*Introduction to Pharmacy Practice Experience

**Sequential Courses

P-4 Advanced Pharmacy Practice Experiential Year

APPE Rotations

The APPE portion of the curriculum consists of 7 rotations in various settings. One rotation is 6 weeks in duration, and the others are 5 weeks each in duration for a total of 35 credits over 36 weeks. Entry into APPEs requires successful completion of the P1-P3 curriculum in full.

There are four required APPE rotations:
PHA-510 Internal Medicine
PHA-511 Ambulatory Care
PHA-512 Community Practice
PHA-513 Health System

In addition, there are three elective APPE rotations. Information will be provided during the P-3 year.

PHA...
PH.A. PHA

PHA-301. & PHA 304 FOUNDATIONS OF PHARMACY PRACTICE
Credits: 2
The purpose of this two-semester course is to provide the student with the foundational knowledge, skills and attitudes needed to practice pharmacy in the 21st century. In particular, this course will focus on skills (communication, teamwork), attitudes and other content relevant to the practice of pharmacy. The school’s team-focused approach to learning is emphasized throughout. This course fulfills experiential requirements and so students will have the opportunity to interact with pharmacists and patients. Requirement: P-1 standing.

PHA-302. , 401, 402, 501 & 502 PHARMACY CARE LAB I - V
Credits: 1 each
This five-semester sequence is designed to develop the student’s ability to integrate and apply information as well as practice skills that are taught throughout the curriculum. The use of case studies, role-plays, presentations, and other active-learning strategies engages students in the learning process and requires them to synthesize information at increasing levels of complexity as the student moves through the course sequence. Requirement: P-1, P-2, or P-3 standing, as appropriate for each laboratory.

PHA-308. PHARMACEUTICAL AND HEALTH CARE DELIVERY
Credits: 3
Examination of health and pharmaceutical delivery in the U.S. conducted from a societal perspective. Emphasis is on public policy, economic behavior, and outcomes. Application will be made to various pharmaceutical sectors (e.g., retail, health, systems, manufacturing). Students should gain an understanding of factors driving transformation of health care delivery and the implications for future pharmacy practice. Lecture: three hours per week. Requirement: P-1 standing or consent of the instructor.

PHA-310. CLINICAL RESEARCH AND DESIGN
Credits: 3
Application of research design concepts and statistical techniques to design, critically analyze, and interpret preclinical, clinical, and economic studies of pharmaceuticals and treatment plans. Lecture: three hours per week.

Pre-Requisites
MTH-150 or equivalent and P-1 standing or consent of the instructor.

PHA-311. & PHA 312 PHARMACEUTICS I & II
Credits: 4
The study and application of physical-chemical principles that are necessary for the design, development, and preparation of pharmaceutical dosage forms. The study of quantitative skills necessary for an understanding of the basic and clinical pharmaceutical sciences, including skills in pharmaceutical calculations and extemporaneous preparation of dosage forms. Lecture: three hours per week. Laboratory and Recitation: three hours per week. Requirement: P-1 standing or consent of the instructor. NOTE: PHA-311 is a prerequisite for PHA-312.

PHA-313. PHARMACY CALCULATIONS
Credits: 1
The common mathematical processes that a pharmacist may encounter in professional practice are covered. Interpretation of the prescription, including Latin abbreviations, will be discussed. Medical terminology and the generic name, trade name, manufacturer, and classification of the top 100 drugs will also be presented. Lecture one hour per week. Requirement: P-1 standing or permission of the instructor.

PHA-327. MEDICAL MICROBIOLOGY
Credits: 3
An overview of microbiology with special emphasis on pathogenic microbiology. Lecture: three hours per week. Lab: three hours per week. Cross-listed with BIO-327. Requirement: P-1 standing or consent of the instructor.

PHA-331. & PHA 332 MEDICAL ANATOMY AND PHYSIOLOGY I & II
Credits: 4
In-depth principles of human anatomy and physiology as well as an introduction to pathophysiology will be presented. Lecture: Two hours per week. Recitation and Lab: two hours per week. Requirement: P-1 standing or consent of the instructor. This course is restricted to enrolled Pharmacy students. Consideration may be given to non-pharmacy students with overall GPAs of 3.0 or greater, if there is room in the lecture and lab sessions, and with instructor approval. NOTE: PHA 331 is a prerequisite for PHA 332.

PHA-335. INTRODUCTORY PHARMACY PRACTICE EXPERIENCE I
Credits: 2
This course will provide introductory practice experience to students in the community setting. The course fosters the development of professionalism in an environment of practical application of knowledge, skills, and attitudes. Students will be faced with a variety of issues practical to community pharmacy. The student will take an independent learning approach under the supervision of a practicing community pharmacist. The course is two full-time weeks (80 hours) of experience.

Pre-Requisites
Successful completion of all required courses in the P-1 year or permission of instructor.

PHA-365. MEDICAL BIOCHEMISTRY
Credits: 4
Introduction to basic biochemistry concepts, focusing on the structure and function of vitamins, proteins, and lipids as well as bioenergetics and major catabolic pathways. The catabolism of carbohydrates, fats and amino acids will be discussed including reactions and regulation. Common metabolic pathways of drugs, enzyme induction and metabolism down regulation will also be presented. Lecture: Four hours per week. Cross-listed with CHM-365, BEGR-465.

Pre-Requisites
P-1 standing or consent of the instructor.
PHARMACOLOGY & MEDICINAL CHEMISTRY

PH-A-310. DRUGS THAT DICTATE THEIR BIOLOGICAL ACTIVITY
Credits: 2
Examines delivery of pharmaceutical products and services from a systems perspective in a variety of patient care settings. Focus is upon effectiveness, efficiency, and quality. Covers design of systems, establishment and monitoring of key indicators, total quality management, and quality assurance agencies (e.g., JCAHO, NCQA). Lecture: two hours per week.

PH-A-410. IMMUNOLOGY AND BIOTECHNOLOGY
Credits: 3
A discussion of nonspecific host defense mechanisms and a detailed description of specific immunity. Products that impart artificial active and passive immunity are presented. The concept of biotechnology is discussed together with the currently available products of genetic engineering that relate to immunology. The various immunological disorders and the immunology of cancer and HIV are discussed. Lecture: three hours per week.

Pre-Requisites

PH-A-411. BIOPHARMACEUTICS AND CLINICAL PHARMACOKINETICS
Credits: 3
The fundamentals of biopharmaceutics and pharmacokinetics are presented. The physical and chemical properties of the drug and dosage form and the impact of the route of administration and patient characteristics and disease state will be related to the absorption, distribution, metabolism, and elimination in the body. Individual drugs and patient case histories will be used to familiarize the student to practice. Lecture: three hours per week.

Pre-Requisites
PH-A-311, PH-A-312, or consent of the instructor.

PH-A-412. MANAGEMENT OF PHARMACY OPERATIONS
Credits: 3
The principles of management, including personnel and financial management, will be covered as they apply to management of pharmacy operations in a variety of settings (e.g., community, health system, managed care). Lecture: three hours per week.

Pre-Requisites
PH-A-308 or consent of the instructor.

PH-A-421. PHARMACOTHERAPEUTICS I: PRINCIPLES OF PHARMACOLOGY & MEDICINAL CHEMISTRY
Credits: 2
This course is the 1st of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This particular course will emphasize the most fundamental concepts central to drug therapy. A major emphasis will be placed on the interactions of drugs with their cellular targets in the human body, and the chemical properties of drugs that dictate their biological activity.

Pre-Requisites

PH-A-423. PHARMACOTHERAPEUTICS II: PRINCIPLES OF PHARMACOTHERAPEUTICS
Credits: 2
This course is the 2nd of a twelve module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for understanding Pharmacotherapeutics principles.

Pre-Requisites
PH-A-421.

PH-A-425. PHARMACOTHERAPEUTICS III: SELF-CARE AND DERMATOLOGY*
Credits: 3
This course is the 3rd of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmacological management of dermatological disorders and self-care issues.

PH-A-426. PHARMACOTHERAPEUTICS IV: GASTROINTESTINAL DISORDERS*
Credits: 2
This course is the 4th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmacological management of gastrointestinal diseases.

PH-A-428. PHARMACOTHERAPEUTICS V: INFECTIOUS DISEASES*
Credits: 4
This course is the 5th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmacological management of infectious diseases.

PH-A-430. PHARMACOTHERAPEUTICS VI: HEMATOLOGY, JOINT, AUTOIMMUNE AND MUSCULOSKELETAL DISORDERS
Credits: 2
This course is the 6th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmacological management of joint, autoimmune and musculoskeletal diseases.

Pre-Requisites
PHA-435. PHARMACOGENOMICS  
Credits: 2  
Students will learn to understand how human genetics and genomics can be used to provide optimized drug therapy and patient care. Learning about this emerging field will enable students to better understand and manage new genomics-based diagnostic tools and make personalized treatment choices. Students will also spend time discussing societal and ethical implications of genetic testing and the resultant individualization of drug therapy, explain basic principles of human genetics and heredity, and more. Requirement: P-3 standing.

PHA-440. INTRODUCTORY PHARMACY PRACTICE EXPERIENCE II  
Credits: 1  
This course will provide introductory practice experience to students in two health care settings: prescriber’s clinics and a faculty practice site. Students will have an independent approach to learning and gain a broader understanding of these settings and the role that pharmacists may play. Requirement: Successful completion of all required courses in the P-1 year, or permission of instructor.

PHA-445. INTRODUCTORY PHARMACY PRACTICE EXPERIENCE III  
Credits: 2  
This course will provide introductory practice experience to students in the health-system setting. The course fosters the development of professionalism in an environment of practical application of knowledge, skills, and attitudes. Students will be faced with a variety of issues practical to this area of practice. The student will take an independent learning approach under the supervision of a practicing community pharmacist. The course is two full-time weeks (80 hours) of experience. Requirement: Successful completion of all required courses in P-2 year, or permission of instructor.

PHA-450. NEUROPHARMACOLOGY OF DRUGS OF ABUSE  
Credits: 3  
In-depth analysis of drugs of abuse, including pharmacokinetics, pharmacodynamics, tolerance, sensitization, physical dependence, and effects of drug use during pregnancy. Drug testing and substance abuse treatment strategies will also be discussed. Lecture: three hours.

Pre-Requisites  
PHA-421 or consent of the instructor.

PHA-452. EXTEMPORANEOUS COMPOUNDING  
Credits: 3  
Students will achieve basic and advanced skills in compounding pharmaceutical dosage forms for individualized patient therapy to replace a lack of commercially available products and enhance therapeutic problem-solving between the pharmacist and physician to enhance patient compliance. Students will work independently on research assignments and compounding preparations. Lecture: one hour per week. Lab: six hours per week.

Pre-Requisites  
PHA-311 and PHA-312 and consent of the instructor.

PHA-456. CONCEPTS IN PRIMARY CARE  
Credits: 2  
The course is designed to allow students to explore and develop advanced knowledge and skills related to diseases and medications commonly encountered in a primary care environment. This course will be of value to pharmacy students seeking careers in ambulatory care pharmacy practice, community pharmacy, long-term care and population health management. Topics are presented in a case-based discussion format that includes multiple diseases and medications and through student-led mini topic discussions.

Pre-Requisites  
PHA-311 and PHA-312

PHA-488. COMPREHENSIVE PAIN MANAGEMENT  
Credits: 2  
This course is an interactive and interprofessional approach to the assessment and management of pain. Various teaching and learning strategies will allow students to develop and appreciate the understanding of the social, psychological, physical, spiritual and ethical implications of pain.

Pre-Requisites  
PHA-331 and PHA-332 and PHA-421 or consent of instructor

PHA-498. PHARMACY INFORMATICS  
Credits: 2  
Pharmacy Informatics is concerned with the use of technology to improve patient care as well as increasing patient safety. Informatics deals with data generated by software used in patient care, not only the storage of data but also the retrieval of data as meaningful clinical reports. Lecture: two hours per week. Requirement: P-2 standing or consent of the instructor.

PHA-503. AND PHA 504 LONGITUDINAL CARE LAB I & II  
Credits: 1  
Students will follow a patient or patients over an extended period of time in a medical or home setting. Pharmaceutical knowledge and skills will be applied in communications, health assessment, monitoring or pharmacotherapy, evaluation of both humanistic and clinical outcomes. Issues of health care, cost access, and quality as revealed through each patient’s interaction with health and pharmaceutical care systems will be addressed. Three hours per week. Students are responsible for transportation to and from all off-campus experiential sites.

Pre-Requisites  
PHA-503 is the prerequisite for PHA-504.

PHA-505. PHARMACY LAW  
Credits: 2  
The study of federal and state statutes, regulations, and court decisions, which control the practice of pharmacy and drug distribution. Civil liability in pharmacy practice and elements of business and contract law will be covered. Lecture: two hours per week.
PHA-509. ECONOMIC EVALUATION OF PHARMACEUTICAL PRODUCTS AND SERVICES
Credits: 3
Introduction to commonly used economic evaluation methods (e.g., cost-minimization, cost-utility, cost-effectiveness) as applied to pharmaceutical products and services. Quality of life and outcomes research will also be explored. Emphasis is on understanding evaluation methods and research design and interpreting the relevant literature for practice applications. Lecture: three hours per week.

Pre-Requisites
PHA-308 and PHA-310 or consent of the instructor.

PHA-510. GENERAL MEDICINE ADVANCED PHARMACY PRACTICE EXPERIENCE
Credits: 5-6
Integration of the basic pharmacy related concepts to the delivery of pharmaceutical care in general medicine practice. Clinical practice: 40 hours per week for five to six weeks.

Pre-Requisites
Successful completion P1-P3 curriculum in full.

PHA-511. AMBULATORY CARE ADVANCED PHARMACY PRACTICE EXPERIENCE
Credits: 5-6
Integration of the basic pharmacy related concepts to the delivery of pharmaceutical care in ambulatory care settings. Clinical practice: 40 hours per week for five to six weeks.

Pre-Requisites
Successful completion P1-P3 curriculum in full.

PHA-512. COMMUNITY ADVANCED PHARMACY PRACTICE EXPERIENCE
Credits: 5-6
Integration of the basic pharmacy related concepts to the delivery of pharmaceutical care in community practice settings. Clinical practice: 40 hours per week for five to six weeks.

Pre-Requisites
Successful completion P1-P3 curriculum in full.

PHA-513. HEALTH SYSTEM ADVANCED PHARMACY PRACTICE EXPERIENCE
Credits: 5-6
Integration of the basic pharmacy related concepts to the delivery of pharmaceutical care in the health system settings. Clinical practice: 40 hours per week for five to six weeks.

Pre-Requisites
Successful completion P1-P3 curriculum in full.

PHA-521. PHARMACOTHERAPEUTICS VII: PULMONARY DISORDERS*
Credits: 2
This course is the 7th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmaceutical management of pulmonary diseases.

Pre-Requisites
*PHA-423 is prerequisite to PHA-425 - PHA-530.

PHA-523. PHARMACOTHERAPEUTICS VIII: CARDIOVASCULAR DISORDERS*
Credits: 4
This course is the 8th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmaceutical management of cardiovascular diseases

Pre-Requisites
*PHA-423 is prerequisite to PHA-425 - PHA-530.

PHA-525. PHARMACOTHERAPEUTICS IX: RENAL DISORDERS*
Credits: 2
This course is the 9th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmaceutical management of renal diseases.

Pre-Requisites
*PHA-423 is prerequisite to PHA-425 - PHA-530.

PHA-526. PHARMACOTHERAPEUTICS X: ENDOCRINE DISORDERS & WOMEN'S HEALTH ISSUES*
Credits: 2
This course is the 10th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmaceutical management of endocrine diseases.

Pre-Requisites
*PHA-423 is prerequisite to PHA-425 - PHA-530.
Course Descriptions

PHA-528. PHARMACOTHERAPEUTICS XI: NEOPLASTIC DISEASES*
Credits: 2
This course is the 12th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmaceutical management of gastrointestinal diseases.

Pre-Requisites
*PHA-423 is prerequisite to PHA-425 - PHA-530.

PHA-530. PHARMACOTHERAPEUTICS XII: CENTRAL NERVOUS SYSTEM DISORDERS*
Credits: 4
This course is the 11th of a twelve-module sequence that will integrate pharmacology, medicinal chemistry, pathophysiology and therapeutics. This team taught course is designed to provide students with an opportunity to learn, observe and apply concepts of these four content areas in an integrated manner. Concepts in each of these content areas will be emphasized to provide the necessary information for pharmaceutical management of CNS and mental health disorders.

Pre-Requisites
*PHA-423 is prerequisite to PHA-425 - PHA-530.

PHA-532. ALTERNATIVE MEDICINE AND NUTRITION
Credits: 3
The purpose of the Alternative Medicine and Nutrition course is to help students learn to integrate unconventional treatments (natural medicines, manipulation therapy, acupuncture, etc.) into traditional treatment strategies. Additionally, students will learn about nutrition support practices, including enteral and parenteral care.

Pre-Requisites
PHA-331, PHA-332, PHA-365 or consent of the instructor.

PHA-534. INTRODUCTION TO HOSPITAL PHARMACY PRACTICE
Credits: 2
This course introduces students to the practice of pharmacy within a hospital setting. Topics discussed include the accreditation process for hospitals, career options and residency or fellowship training, medication formulary management, automation and technology in hospital pharmacies, medication calculations, medication safety, clinical pharmacy practice, and sterile product preparation.

PHA-536. PRINCIPLES OF ADVANCED COMMUNITY PHARMACY MANAGEMENT
Credits: 2
This course is designed to provide a foundation for students interested in pursuing the development and implementation of advanced clinical programs in a community pharmacy. The student will be introduced to principles in pharmacy and fiscal management, professional development, and the management and legal issues relating to clinical pharmacy services. Didactic and active learning techniques will be employed throughout the course and the student will be required to develop a business plan.

PHA-538. PEDIATRIC PHARMACOTHERAPY
Credits: 2
This course is designed to expand the student's current knowledge base regarding the pediatric population and to introduce the core concepts involved in the care of this special population. The course prepares students to identify and address drug-related problems in pediatric patients and to demonstrate competency within those areas. This will be accomplished by completion of case scenarios, actual patient presentations, and a take-home examination. An on-site visit to the Children's Hospital of Philadelphia (CHOP) is required. Requirement: P-3 standing.

PHA-540. COMPREHENSIVE DIABETES MANAGEMENT
Credits: 3
This course provides a multidisciplinary foundation for health professionals in the principles of diabetes management. Students who successfully complete the course will have knowledge and the basic skill set that is needed to begin practicing diabetes management. The majority of this course is independent self-study of online lectures, but there are mandatory on-campus discussions and exams. Requirement: P2 or P-3 standing.

PHA-544. MANAGED CARE PHARMACY
Credits: 2
This elective is intended to help future pharmacists interested in any area of practice better understand the clinical and business decision-making processes of the health care system. The elective will introduce and reinforce the concepts of population health and value, explore tools available to limit healthcare spending, and discuss unique ways pharmacists can be involved in improving patient care. This course will be offered during the spring semester each year.

Pre-Requisites
P2 or P3 standing.

PHA-551. VETERINARY PRODUCTS
Credits: 3
Veterinary Products is designed to introduce pharmacy students to Veterinary Pharmacology and Therapeutics and the role of the pharmacist in the care of animals. The students will evaluate the most commonly used drugs in veterinary care and relate that evaluation to the use of these drugs in humans. The student will learn fundamental concepts that will allow the student to provide pharmaceutical care to animals and assist the veterinarian and owner in the care of pets and domestic animals. There will be a field trip to a zoo on one Saturday during the course.

Pre-Requisites
PHA-424 and PHA-426.

PHA-552. PRINCIPLES OF BIOORGANIC AND MEDICINAL CHEMISTRY
Credits: 3
This will be an introductory course, the aims of which are to provide the principles of bioorganic and medical chemistry, including an understanding of drug structure-activity relationships, prediction of the physicochemical properties of a drug, basic knowledge of the major pathways of drug metabolism, and factors that can contribute to drug-drug interactions.

Pre-Requisites
CHM-231-232, PHA-327, 365.
Course Descriptions

PHA-555. INTRODUCTORY PHARMACY PRACTICE EXPERIENCE IV
Credits: 1-half
This course will provide introductory practice experience to students in the home health setting. Students will gain a broader understanding of this setting and the role that pharmacists may play. Requirement: successful completion of all required courses in the P3 year, or permission of instructor.

PHA-556. ROLE OF PHYTOCHEMICALS ON HEALTH AND DISEASE
Credits: 2
Students will learn the basic concepts and classification of phytochemicals present in our daily diet, followed by the study of specific phytochemicals and their relation to human health and disease. Basic mechanisms and pathways through which phytochemicals act and alter will be discussed. Students will have an opportunity to gain an in-depth understanding of a specific phytochemical of their choice or any other phytochemical designated by the instructor through a research review paper and an in-class presentation.

PHA-558. PRINCIPLES OF TOXICOLOGY: FROM BEAKER TO BEDSIDE
Credits: 2
This toxicology elective is designed to provide the student with introductory knowledge of the molecular mechanisms of action and clinical management of poisons. The course will begin with introductory concepts such as history, mechanisms of cell injury and toxicant disposition. The student will then be exposed to the fundamental principles of managing an acutely poisoned patient. Toxicology lectures on each major organ system will prepare students for group presentations. The aims of student presentations will be to achieve a greater understanding of the clinical management of the poisoned patient, and to hone presentation skills. To the extent that is feasible, the course will involve lectures, or other learning experiences, led by external specialists.
The scope of poisons that will be discussed is broad, and includes environmental toxins, industrial toxicants, and drugs. Specific agents will include heavy metals, volatile solvents, common plant toxins, rodenticides, and several drugs. Students may be expected to participate in one laboratory exercise, wherein they will learn a fundamental method to characterize the mechanism and/or extent of cell death induced by a toxicant.

Pre-Requisites
P-2 or P-3 standing or permission of the instructor

PHA-599. A, B AND C ELECTIVE ADVANCED PHARMACY PRACTICE EXPERIENCE ROTATIONS
Credits: 5-6
Advanced pharmacy practice experience involved in different aspects of pharmaceutical care. (Courses to be determined.) Clinical practice: 40 hours per week for a total of five weeks.

Pre-Requisites
Successful completion P1-P3 curriculum in full.

PHA-560. INTRODUCTORY PHARMACY PRACTICE EXPERIENCE V
Credits: 1-half
The Self-Directed Introductory Pharmacy Practice Experience (SD-IPPE) course is designed to expose students to various service-learning opportunities throughout their P1 through P3 years. This experience consists of three components: participation in and development of service-learning projects, reflection, and self-directed learning. Students may develop their own experiences or participate in opportunities offered by the School or professional organizations.
Requirements for service learning hours will increase as the student progresses through the curriculum. Each student must complete a minimum of 2, 8, and 10 hours during the P1, P2, and P3 years, respectively (total 20 hours). Additional details are provided in the SDIPPE syllabus conveniently posted in E*Value.
