

FortiClient VPN Instructions

Users who already have FortiClient VPN installed should follow these steps to update the settings for Single Sign On (SSO).

1. Open the FortiClient VPN application – it should be configured with the Wilkes VPN connection settings.

2. Click on the 3 lines next to the connection name and choose “Edit the selected connection”.

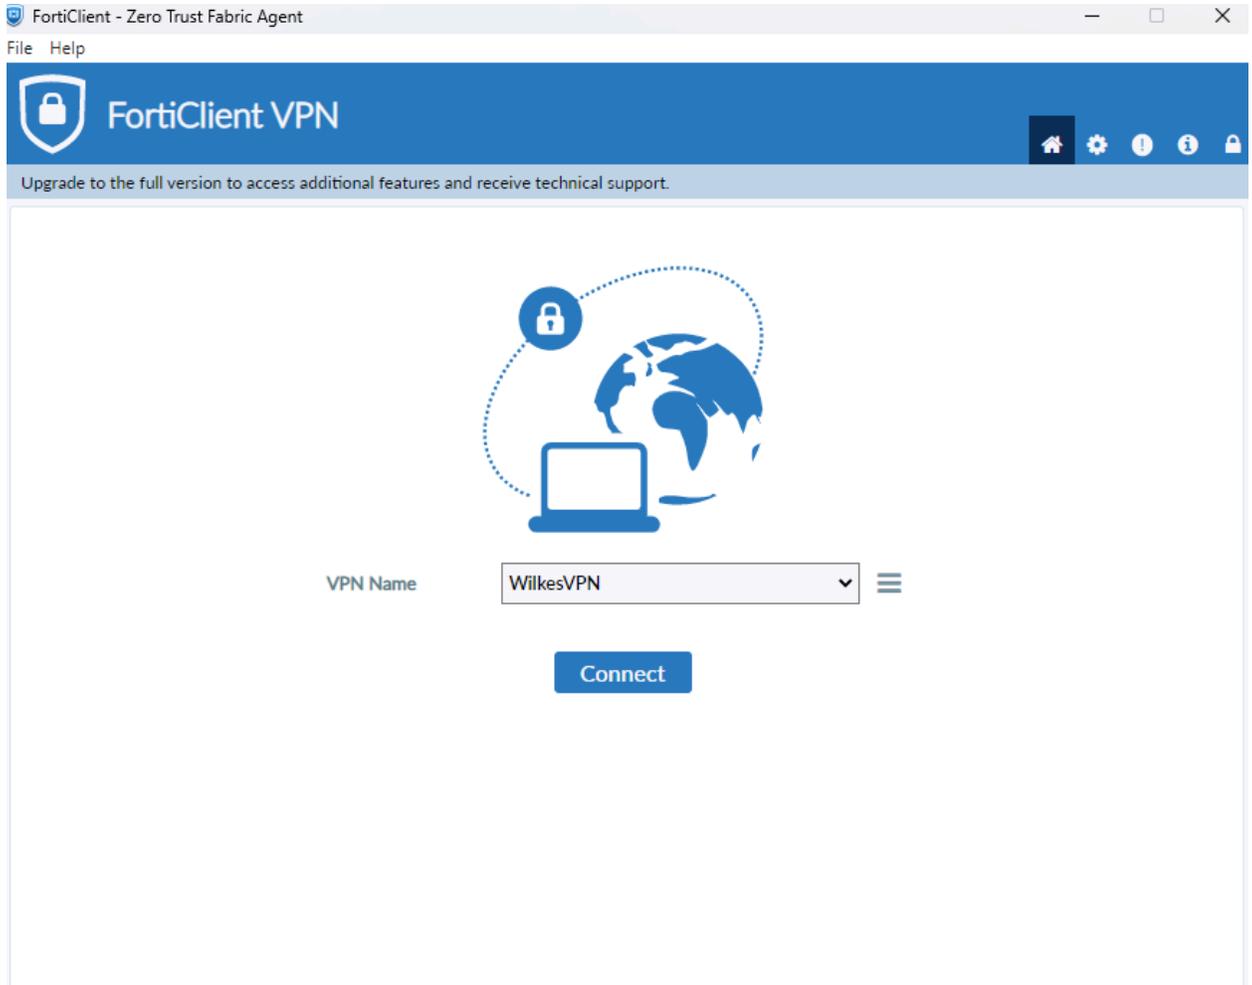

3. Under Single Sign On Settings, check the first 2 boxes*:

- Enable Single Sign On (SSO) for VPN Tunnel
- Use external browser as user-agent for saml user authentication

****Note: If you do not see these checkboxes displayed, please contact the Help Desk at 570-408-4357 or helpdesk@wilkes.edu for assistance.***

4. Click Save. This will take you back to the main page, however, the fields to enter a username and password are no longer visible. The only option is Connect.

5. Click on the Connect button to open your web browser to the Wilkes portal.
6. Sign in using your Wilkes credentials.
7. Once your connection is authenticated, a message will show in the browser notifying you are connected to the FortiClient VPN and that you can close the browser window.
