FAQ – Mac OSX – How do I install the Wilkes VPN client?

Purpose

This guide details the steps to install and connect to the Wilkes VPN client using Mac OSX.
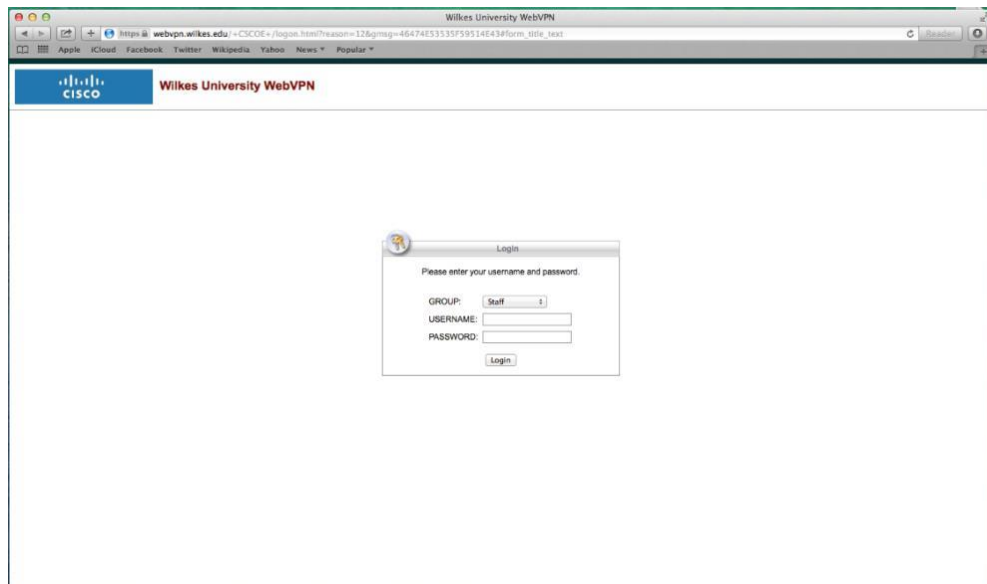

Requirements

- A computer running the Apple Macintosh OSX operating system.
- An active Wilkes account.

Notes

- After installation, you can launch the VPN from the Menu bar > Go > Applications.
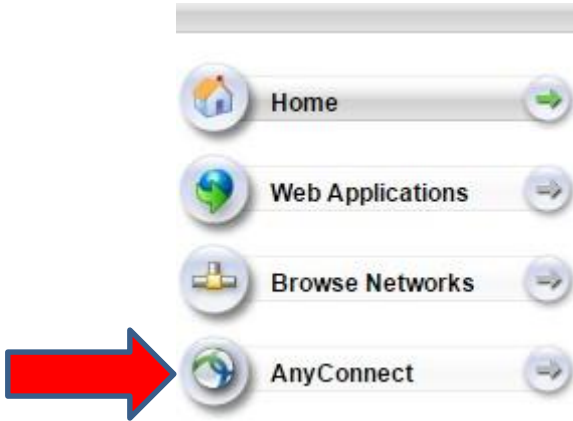

Process

1. Open a web browser and browse to https://webvpn.wilkes.edu/
2. Select the appropriate group, and enter your Wilkes username and password.

FAQ – Mac OSX – How do I install the Wilkes VPN client?

6. The Cisco AnyConnect image file should open – if not, check your Download folder for a newly downloaded **DMG File** and open it.

   Once it opens, run the **anyconnect-macos-x.x.xx PKG file.**

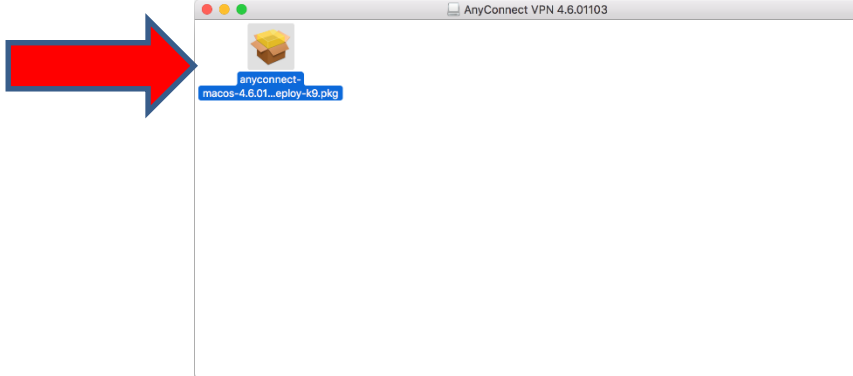

7. Follow the installation, continuing as needed.
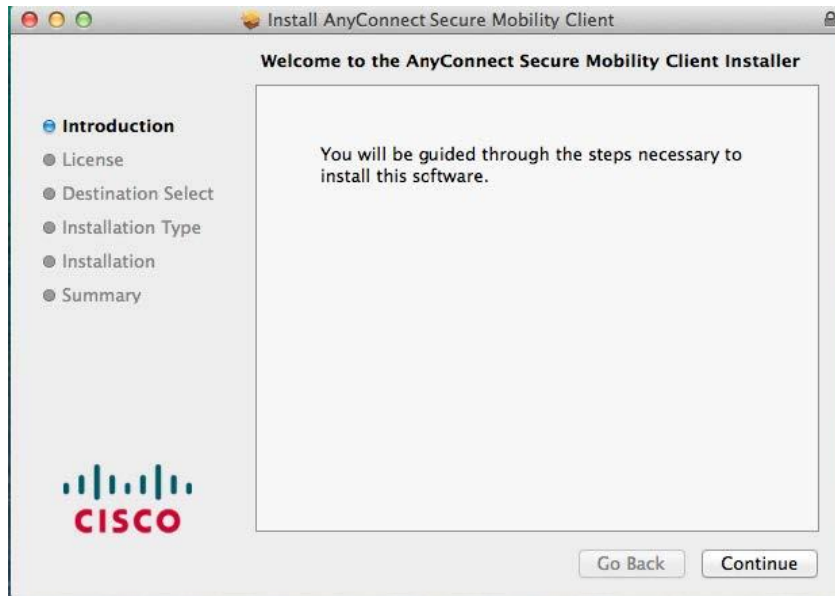

8. You will be able to find the AnyConnect Secure Mobility software located in your Applications folder; **Menu Bar > Go > Applications > Cisco > Cisco AnyConnect Secure Mobility Client**.
