FAQ – Windows – How do I install the Wilkes VPN client?				

Purpose

This guide details the steps to install and connect to the Wilkes VPN client using Windows.

Requirements

- A computer running the Windows operating system.
- An active Wilkes account.

Notes

- After installation, you can launch the VPN from the Start Menu > All Programs > Cisco.

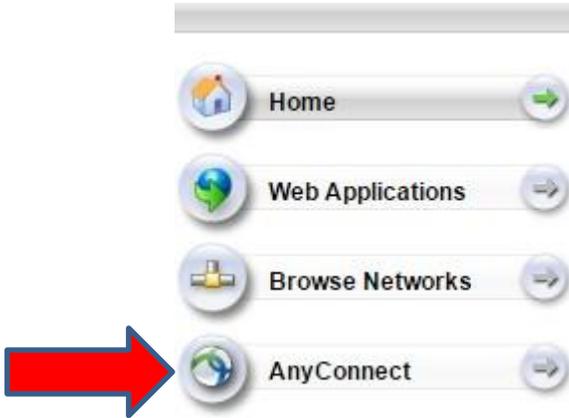

Process

1. Open a web browser and browse to <https://webvpn.wilkes.edu/>
2. Select the appropriate group, and enter your Wilkes username and password.

FAQ – Windows – How do I install the Wilkes VPN client?				

- The Cisco AnyConnect installation will start – if not, check your Download folder and run the installer. Continue with the installer as needed until the installation finishes.

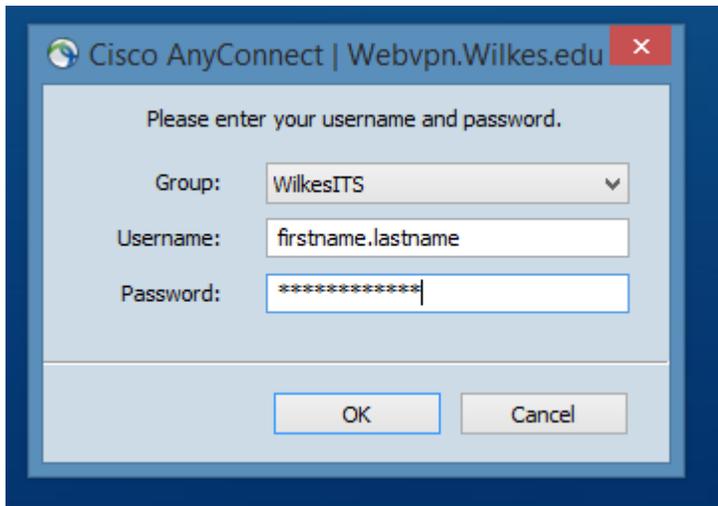

- You will be able to find the AnyConnect Secure Mobility software located in your All Programs list; **Start > All Programs > Cisco > Cisco AnyConnect Secure Mobility Client**.
- Open **Cisco AnyConnect**.
- In the blank field, type **webvpn.wilkes.edu** and then click **Connect**.
